Tim,

My go to meeting connection stopped and when I tried to get back in it just sat and said waiting for organizer.

Here are the notes I took. All in all that was a very useful meeting. Ken has turned out to be a great resource.

Explain what a non qualified FF is - include the number of non qualified ff's not just a percent.

Take nfpa references out for EMS portion of he presentation.

Refer to act 32 and 14 minute response standard - we have to look this up.

Ambulance issues going public in the next few months for a Montgomery county squad that will fold.

Create a Glossary of terms to hand to the public.

Draw comparison to successful New Jersey model.

Need to include an estimate for annual operational costs for ambulance and als responder alternatives.

Look at 990's for squads in Montco to review financial sustainability.

Add slide for emergency response zone maps.

Need better maps showing location of existing providers. What is the significance of the red circle? Does it represent a 1 or 2 mile radius???

Narrow milestone timeline (months)

Don't say 'dispose' of mont Clare fire station.

Add target date to hire 2 ff's and go to 12 hr shifts (early 2019)

Consider Einstein para medicine grant.

More emphasis on regional approach to get ahead of closing EMS squads.
